Canada’s only Doctor of Naturopathy Degree
Dr. Shreya Batra, ND (Class of 2019)
Hometown: Mississauga, Ontario

Cover photo:
Dr. Ayla Andrus, ND (Class of 2017)
Hometown: Dawson Creek, British Columbia
The Canadian College of Naturopathic Medicine (CCNM) offers the only Doctor of Naturopathy degree in Canada through its four-year, full-time naturopathic medicine program.*

The Doctor of Naturopathy degree program provides more than 3,000 hours of classroom training and 1,200 hours of clinical experience. The foundation for a successful career as a naturopathic doctor is gained through courses in:

- History, philosophy and principles of naturopathic medicine;
- Art and practice of naturopathic medicine; and,
- Foundations of naturopathic medicine.

CCNM’s curriculum includes:

- Biomedical sciences;
- Clinical nutrition;
- Lifestyle management;
- Traditional Chinese medicine and acupuncture;
- Botanical (herbal) medicine; and,
- Physical medicine.

In addition, CCNM offers the following electives to its third- and fourth-year students:

- Naturopathic integrative fertility;
- Fibromyalgia and Myalgic Encephalomyelitis;
- Naturopathic integrative oncology;
- Pediatrics;
- Sports medicine;
- Mental health; and,
- Special topics in: traditional Chinese medicine, botanical medicine, homeopathic medicine, clinical nutrition and physical medicine.

These electives enable students to delve more deeply into naturopathic modalities or focus on an area that interests them. Some are delivered in a hybrid style, incorporating both independent learning via online modules and classroom sessions where teachings are discussed. You must take at least four electives over the course of third and fourth year.

More details about CCNM’s Doctor of Naturopathy degree can be found at ccmn.edu

* This program is offered under the written consent of the Ministry of Colleges and Universities for the period from May 20, 2014 to May 20, 2019. The College has submitted an application for renewal as of May 19, 2018. As a result, the period for the current consent is extended until the Minister of Colleges and Universities issues their decision on the application for renewal.
Preparing for your future career starts in first year. Career training begins in the very first term, through preceptoring, which is a component of the ND program that allows students to observe health-care practitioners in the community.

Preceptoring provides students with a wide variety of experiences to develop the clinical knowledge, attitudes and skills relevant to the role of a naturopathic doctor.

Students then expand their work in our teaching clinics, observing and then participating in patient care, and eventually, in their last year, interning full-time at CCNM’s naturopathic clinics and choosing to work with NDs across Canada. CCNM’s curriculum offers courses in practice management, carefully designed so that students think about how they will manage their future practice. Topics such as accounting principles, finances and marketing help emerging NDs plan their professional careers.

Students gather in CCNM’s cafeteria to study.
Graduate Successes

More than twenty per cent of all NDs practising in North America are graduates of CCNM. Whether it’s opening a private practice, partnering with a team of NDs, or pursuing a more integrative approach to medicine with other health-care professionals in a multidisciplinary setting, graduate success takes many paths.

Dr. Ayla Andrus, ND
Dr. Andrus, ND (Class of 2017), recently opened her practice, Oak Naturopathic Clinic, in Northern British Columbia. Ayla operates as a solo practitioner, but has situated herself in a lively medical building with many other health-care specialists. Oak Naturopathic Clinic itself is a general family practice, but Ayla has developed a special interest in reproductive and digestive concerns. Ayla has expressed great excitement for the opportunity to open her own practice within a supportive, budding community.

Dr. Rick Bhim, ND
Dr. Bhim, ND (Class of 2016), chose to attend CCNM and become an ND so he could focus on prevention, education, treating the whole person, and individualized care. Rick completed bridge delivery at CCNM in 2016 and was accepted to the Clinical Residency program. He completed his second residency at the CCNM Integrated Cancer Centre in 2020 and is currently a clinical supervisor at the RSNC and practises privately.

Dr. Natasha Montroy, ND
Dr. Montroy, ND (Class of 2004), along with her team of ten health-care professionals, incorporates counselling, massage therapy and acupuncture at her practice the Vancouver Island Naturopathic Clinic. Natasha is a frequent guest on Breakfast Television and the local radio station in Victoria, B.C., promoting the benefits of naturopathic care; appearances that have helped grow her clinic.

Dr. Ellen Conte, ND
Dr. Conte, ND (Class of 2015), completed a two-year residency position at the Centre for Health Innovation (CHI), formerly the Ottawa Integrative Cancer Centre (OICC). Following the residency, she accepted a position as a clinician scientist, splitting her time between clinical care and research. Ellen recently moved back to Nova Scotia and continues to practise privately with a focus on integrative cancer care.
“Every day, I have the opportunity to sit with amazing people who truly want to better themselves. I facilitate and advocate for their health journey with natural, effective and evidence-based solutions.”

Dr. Ayla Andrus, ND (Class of 2017)
Hometown: Dawson Creek, British Columbia

“Naturopathic medicine provided me the education I needed to address my patients’ concerns on multiple levels. Using what I’ve learned from the IMG bridge delivery program, I have been able to help my patients achieve their health goals and improve their quality of life.”

Dr. Rick Bhim, ND (Class of 2016)
Hometown: Toronto, Ontario

“I remember being a student and the seasoned practitioners with various practice focuses that I was exposed to. Even now I complete externships two to four times a year with MDs. There’s still so much to learn.”

Dr. Natasha Montroy, ND (Class of 2004)
Hometown: Victoria, British Columbia

“Research improves clinical care for patients and drives integration and collaboration amongst health-care providers. CCNM has an active research department, employing a diverse team of researchers and providing opportunities for students to become engaged in the scientific advancement of the field.”

Dr. Ellen Conte, ND (Class of 2015)
Hometown: Halifax, Nova Scotia
Research

CCNM is currently conducting more than $10 million in studies, much of which focusses on examining a variety of adjunctive therapies for cancer care and assessing whole practice approaches to diabetes. CCNM is a leading institution in the field of integrative cancer care, creating foundational information that will change the oncology landscape for higher quality, patient-centred care.

As a leader in evidence-based naturopathic medicine research, CCNM’s research results have been published in top-tier medical journals such as Canadian Medical Association Journal, The Lancet and The British Medical Journal, as well as in leading journals specific to complementary and integrative medicine.

One of CCNM’s most significant and well-known research studies – involving the Canadian Post Corporation and the Canadian Union of Postal Workers – demonstrated a long-term reduction of cardiovascular disease risks. Naturopathic treatments reduced the risk factors for heart attacks and strokes among participating postal employees and better cardiovascular health led to increased productivity.

A companion economic study estimated $1,187 per participant in direct savings, making a compelling case for incorporating naturopathic medicine into employee benefits packages. Additional studies in this series demonstrated the efficacy of naturopathic care for treating chronic back pain, rotator cuff tendonitis and anxiety.

Through support from CCNM’s Student Innovation Fund and Research Club, students are provided with opportunities to apply for internal funding for faculty-student research projects or participate in ongoing research.
### Integrative Cancer Research

CCNM and the Centre for Health Innovation in Ottawa, Ontario were awarded a $3-million grant in conjunction with Dr. Leanna Standish, ND, and Bastyr Integrative Oncology Research Centre for a joint Canadian/U.S. research investigation into advanced treatment for stage 4 cancer patients.

CCNM’s Patterson Institute for Integrative Oncology Research is currently creating guidelines for integrative oncology that will provide a much-needed platform of evidence and structure for naturopathic education and practice, as well as a key leverage point to facilitate inter-professional collaboration and shared patient care with other health-care providers.

CCNM is collaborating with Australia’s Endeavour College of Natural Health to conduct the first global study on use of complementary and alternative medicine for patients with cancer.

### Food for Mental Health

Funded by the Canadian CAM Research Fund, CCNM is collaborating with researchers from McGill University and the Centre for Addiction and Mental Health to develop a tool that can be used by various health-care providers to support the implementation of food-based approaches to treating various mood disorders.

### Type 2 Diabetes Study

CCNM, the William Osler Health System and the Wise Elephant Family Health Team were awarded a $418,000 grant in 2015 to assess outcomes of adjunctive naturopathic care for type 2 diabetes. Of the more than 10,000 Family Health Team patients in the study’s catchment area, approximately 15 per cent present with type 2 diabetes, enabling researchers to collect and compare health outcomes related to specific ethnic and cultural groups.

### Integrative Pain Management

Integrative approaches to chronic pain management are essential to addressing the opioid crisis in North America. Researchers from CCNM are involved in a multitude of projects synthesizing or assessing various therapies used by naturopathic doctors and conventional providers for addressing pain. Winners of CCNM’s 2019 Student Innovation Fund research grant are assessing the impact of naturopathic care on patients with fibromyalgia.

### Digestive Disorders

As a lead steering committee member for the International Research Consortium of Naturopathic Academic Clinics, CCNM is poised to facilitate projects that collect data from naturopathic teaching institutions globally. The first pilot project investigating naturopathic approaches for irritable bowel syndrome is in place, helping us attest to the outcomes of care that naturopathic interns provide for this chronic, difficult to manage disorder.

### The Microbiome

CCNM’s Chair in Microbiome Research is embarking on a landmark study on the interface between our environment and our microbiome in maternal and infant health. This work aims to provide a better understanding of how our microbiome can mitigate the myriad of factors pertaining to mental health outcomes.
Academic & Faculty Leadership

Our faculty brings together leading researchers, clinicians and teachers in naturopathic medicine. NDs, PhDs, MDs and other specialists work together to help students prepare for successful careers as naturopathic doctors.

Dr. Nick De Groot, ND, M.Ed.
Dr. De Groot, ND, Dean of CCNM, is responsible for overseeing the Doctor of Naturopathy degree program and for ensuring that the teaching standards at CCNM meet the highest standards of clinical education and patient care. For over 10 years, he has overseen the development and integration of naturopathic care in a number of locations in Ontario, including the CCNM Brampton Naturopathic Teaching Clinic, as well as clinics in McMaster University, Seneca at York and the Queen West Toronto Central Community Health Centre. Nick holds a B.Sc. in molecular biology and genetics from the University of Toronto (U of T) and his Doctor of Naturopathic Medicine from CCNM. He also obtained a Masters in Education with a focus in higher education from the Ontario Institute for Studies in Education (OISE) at U of T.

Dr. Mitchell Zeifman, B.Sc., ND
Dr. Zeifman, ND, has been practising as a naturopathic doctor since graduating from CCNM in 2003 and is currently Associate Dean of Clinical Education. Mitchell oversees the clinical program, which is the culmination of student education at CCNM, a time when the knowledge, skills and attitudes built over the first three years of the naturopathic medicine program is applied to patient care.

Dr. Jasmine Carino, ND, M.Ed.
As the Associate Dean, Curriculum and Residency program, Dr. Carino, ND, designs strategies for curriculum change. Jasmine graduated with a Bachelor of Science in biology and chemistry from Laurentian University in Sudbury, Ontario before attaining her Doctor of Naturopathic Medicine at CCNM. She then completed her Masters in Education with a focus in higher education from the Ontario Institute for Studies in Education (OISE) at the University of Toronto. Jasmine has been a Council of Naturopathic Medical Education (CNME) board member since 2010 and has led a committee in developing guidelines on the use of information and communication technology in naturopathic medical education.

Dr. Jonathan J. Tokiwa, BScN, RN, ND, M.Ed.
Dr. Tokiwa, ND, is Associate Dean of Academic Education and Associate Professor of Emergency Medicine at CCNM. Jonathan completed his Bachelor of Science degree in nursing at the University of Toronto and graduated with a Doctor of Naturopathic Medicine from CCNM. He received his Masters of Education Specialist degree in adult, community and higher education from the University of Calgary. Jonathan is a member of the Ontario Association of Naturopathic Doctors and Canadian Association of Naturopathic Doctors. He is also a member in good standing with the College of Nurses of Ontario and College of Naturopaths of Ontario.
“I believe naturopathic medicine is poised to play an even bigger role in the health and well-being of Canadians. We are regularly approached by different institutions about providing clinical services through our teaching clinics and more patients are seeking the expertise of our graduates to help them manage their chronic health conditions.”

Dr. Nick De Groot, ND, M.Ed. (Class of 1998)

“Naturopathic medicine resonates with the artist and scientist in me. This profession, this medicine, works. I have witnessed the role naturopathic doctors play in the lives of patients. CCNM’s impact is significant and life changing.”

Dr. Jasmine Carino, ND, M.Ed. (Class of 1998)

“I oversee the culmination of our students’ full-time entry into clinical practice and their transition to being interns, when their foundational learning is applied to patient care. I am privileged to witness the development of our talented students throughout the clinical program.”

Dr. Mitchell Zeifman, B.Sc., ND (Class of 2003)

“I am honoured and grateful to have the opportunity to work with so many well-intentioned people who love what they do and are passionate about the well-being of our institution and profession.”

Dr. Jonathan J. Tokiwa, BScN, RN, ND, M.Ed. (Class of 2005)
Campus Life

At CCNM, living on campus combines the best of city living with the convenience, safety and closeness of being onsite, where a cafeteria serves healthy meals and your classes are quite literally down the hall from your room.

CCNM’s co-ed residence comprises 202 single occupancy rooms and is located in the main building. All rooms have a single bed, desk, closet, small refrigerator and Internet. There are TV lounges with balconies overlooking the courtyard and fully equipped kitchens.

For students who choose to live off-campus, a subway entrance, restaurants and stores provide a wide array of services right at CCNM’s doorstep, so you’ll have what you need while attending classes. Our students have the opportunity to participate in guided mediation sessions, welcome therapy dogs on campus, stroll along during nature walks and practise yoga in our garden courtyard. We know that mental health is a large part of student wellness and try to ensure students feel supported as they undertake their studies.

CCNM established Thrive, an on-campus wellness service, to help enable personal and professional growth in students. Its mission is to facilitate, host and inspire opportunities to think about, discuss and practise skills that will support optimal health, resiliency and a shared sense of community at CCNM.

There are a variety of ways to students to get involved on campus. Leadership opportunities, like joining the Naturopathic Students’ Association or the Inclusion, Diversity, Equity and Advocacy (IDEA) Committee, are offered right in first year. We are committed to creating and providing an inclusive community to promote education and diversity, and encourage our students to participate.

Toronto is ranked as the safest city in North America and the second-safest city in the world

Admissions

CCNM is committed to excellence in naturopathic education and to the success of its graduates. To be eligible for admission, future students must complete a three- or four-year bachelor’s degree at an accredited institution.

The decision to admit an applicant is based primarily on the applicant’s undergraduate grade point average (average 3.3, within a range of 2.7 to 4.0) and personal interview.

In addition, the following courses need to be completed prior to admission. CCNM offers most of these prerequisites several times a year in an interactive, online format.

Visit ccnm.edu/psc for more information.

Financial Information*

We know that cost is a key factor when considering higher education. We are proud to offer our Doctor of Naturopathy degree at the lowest tuition of all the accredited naturopathic schools in North America.

CCNM students may be able to take advantage of Canadian and/or provincial student loan programs. CCNM also offers a limited number of bursaries as a result of the generosity of its donors. Private and professional school loans may also be available through your financial institution.

* Please contact CCNM for the most current tuition fees.

Admissions details can be found at ccnm.edu
